

WE'RE HIRING

Outboard (OB) Engineer

Key Responsibilities

- Perform routine servicing, overhauls, and repairs on high-horsepower outboard engines.
- Troubleshoot electronic control units, fuel systems, cooling, and trim/tilt mechanisms.
- Service and install outboard steering systems, throttle controls, wiring, and fuel delivery lines.
- Conduct trials and safety checks to ensure maximum speedboat performance and reliability.
- Maintain detailed maintenance records, service logs, and outboard spare parts stock.

Requirements

- Education: Technical diploma or trade certification in Marine or Mechanical Engineering.
- Experience: 3+ years of hands-on experience and overhauling outboard marine engines.
- Technical Knowledge: Knowledge of modern 2-stroke and 4-stroke outboard marine systems.
- Diagnostic Skills: Proficient in marine tools, electrical, and mechanical troubleshooting.
- Work Style: Physically fit, reliable, and able to work effectively under tight fleet schedules.
